

# TECHNICAL SPECIFICATION SHEET

## HIGH METAL BOND METALLIZED CPP FILM

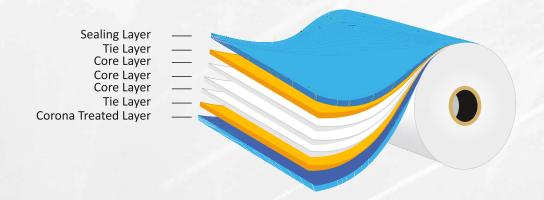

# Product Code: SPCPL-MCPPF-02

| Physical Data                                      |      |                       |              | HIGH METAL BOND METALLISED CPP FILM |           |       |
|--|------|-----------------------|--------------|-------------------------------------|-----------|-------|
| Properties   |      | Units                 | Test Method  | Typicles Values                     |           |       |
| Average Thickness(+5%)                             |      | Micron                | ASTMD 6988   | 20                                  | 22        | 25    |
| Grammage(+5%)                                      |      | Gauge                 |              | 18.1                                | 19.91     | 22.63 |
| Density  |      | gm/cc                 | ISO1183      | 0.905                               |           |       |
| Yield(+5%)   |      | m²/kg                 |              | 55.24                               | 50.22     | 44.18 |
| Surface Tension                                    |      | Dynes/cm              | ASTMD2578    | 38(at time of Dispatch)             |           |       |
| Optical Density                                    |      | %                     |              | 2.0-2.5                             |           |       |
| Haze   |      | %                     | ASTMD1003    |                                     |           |       |

MD: - Machine Direction, TD: - Transverse Direction,, UT: - Untreated, M: - Metal

#### Storage & Handling:

The material to be stored in dry place and at the temperature below 30°C for better treatment stability. The treatment value of the CPP film trends to decay over a period of time. SPCPL is not committed for treatment guaranty over the period. Therefore, it is recommended that the customer should check the treatment levels prior to the processing. It is advised, to inspect and verify the products for suitability of use for the particular purpose. The customer is responsible for the appropriate, safe and legal use of products.

### **Product Description:**

METALLIZED CAST POLYPROPYLENE FILM -ONE SIDE HEAT SEALABLE LAYER, OTHER SIDE CORONA TREATED WITH DEPOSITION OF ALUMINUM LAYER.

#### **Product Application:-**

Confectionary and Bakery products, Pulses, Candies, Namkeens, etc

#### **Technical Features:-**

- Very good heat seal-ability
- Good barrier properties
- Excellent Machineability
- Good Surface
- Improved metal bond with film
- Film compliance with IS10910:1984, 21CFR 177.1520 (c) of US FDA , Food Contact Legislation on specific Material: 2008/39/EC. The product does not have any type of toxicity, can be reprocessed.

SPCPL reserves the right to change the technical datasheet at any time without information.

<sup>\*</sup> Thickness, optical density, COF, SIT can be changed as per requirement.
